

1. Would you support fair consideration of a rezoning that permits the existing Silva Bay well to serve the redevelopment if professional evidence supports it?
2. What safeguards would you require to protect neighbouring wells and groundwater?
3. Would you be prepared to work constructively with Silva Bay and the community to find a solution?
4. If you would not support such a rezoning, what viable alternative do you believe would allow Silva Bay to be redeveloped?
